

Thai-Nichi International College

Bachelor of Science in Data Science and Artificial Intelligence (Improved International Program) (Academic Year 2022)

Name of Program (Curriculum)

English	Bachelor of Science in Data Science and Artificial Intelligence
---------	---

Name of Degree

English	Full name	Bachelor of Science (Data Science and Artificial Intelligence)
	Abbreviated name	B.Sc. (Data Science and Artificial Intelligence)

Program Objectives

Data Science and Artificial Intelligence program is a multidisciplinary field of study, combining the science of statistics and computing with the art of visualization to make well-informed and strategic decisions in business domains. Artificial Intelligence helps provide a more comprehensive data analytics strategy by automating machines to perform tasks that typically require human intelligence.

Our DSA program aims to produce graduates of the next generation who has knowledge foundation and skill sets that can successfully transform vital industries ranging from manufacturing to transportation, finance to digital investment, pharmacy to health care or even agriculture to food and beverage. Students of the program will learn the best practices that can transform data to insight, predict the future trends, and automate the process optimization to drive the business performance and growth.

Strengths of the Program

1. 1st of its kind at undergraduate level
2. Multi-disciplinary fields of study, combining mathematics, statistics, computer science and business
3. Focus on industries that will be main engines of digital economy under Thailand 4.0 policy
4. Study both Japanese and English languages
5. Opportunities in scholarship

Teaching Methodology

- Monozukuri with problem-based learning projects
- Integrated approach with practical hands-on lessons.
- Teach with up-to-date theories and technologies.
- Learn with real industrial platforms and software.
- Apply knowledge to solve business problems for startup and data-driven companies.

Opportunities after Graduation

1. Data Scientist
2. Data Analyst and Modeler
3. Data Architect
4. Machine Learning Engineer
5. Big Data Engineer
6. AI Developer and Engineer
7. Business Intelligence (BI) Developer and Analyst
8. Business Intelligence Solutions Architect
9. Database Developer and Administrator
10. Business Analytics Specialist
11. Data Analytics Consultant
12. Data-driven Product Officer
13. AI Solution Officer
14. Startup/Entrepreneur/Business Owner
